

INSTALL SEND MAIL on LINUX

1. If sendmail isn't installed, install it: `sudo apt-get install sendmail`
2. Configure `/etc/hosts` file: `nano /etc/hosts`
3. Make sure the line looks like this: `127.0.0.1 localhost yourhostname`
4. Run Sendmail's config and answer 'Y' to everything: `sudo sendmailconfig`
5. Restart apache `sudo service apache2 restart`
